

## **GUNITE** Supply & Equipment

**T**he Gunite Supply & Equipment Company began business in 1947 and has been the premier OEM of dry-mix process shotcrete (gunite) equipment in the construction industry since the early beginnings of the gunite process. Gunite Supply & Equipment specializes in the design and manufacturing of shotcrete parts, tools, accessories, and equipment such as the C-10SL & C-10HHD gunite machines.

The C-10SL & C-10HHD gunite machines provide maximum performance and efficiency due to their heavy-duty design

and powerful output. These dry-mix shotcrete machines feature a premium-life feed system, molded discharge liner and exhaust suppression chamber. A tilt-hopper provides easy access for cleaning and setup. The C-10HHD dry-mix shotcrete machine is exclusive to the shotcrete industry, offering a hydraulic motor to rotate the machine's feed system. C-10HHD gunite machines are typically used with batch plants, which provide a power-take-off (PTO) to the motor on the shotcrete machine. The hydraulic motor reduces the overall amount of air needed to power the machine.

Gunite Supply & Equipment offers a complete line of tools, parts, and accessories for shotcrete contractors, especially pool builders. Product categories include wet-mix shotcrete hose, dry-mix shotcrete hose, hose couplings (dry-mix), shotcrete clamps (wet-mix), dry-mix and wet-mix nozzles, plaster nozzles, finishing tools and more.

Other specialty accessories are available such as water booster pumps for increasing water pressure on the job site, scaffolding supports for creating an elevated work platform, shooting wire (piano wire), j-hooks, water meters, pressure gauges, cleanout accessories, air vibrators, line reducers, shotcrete additives, and primers.

Gunite Supply & Equipment allows customers to buy direct from the source with our e-commerce store ([www.gunitesupply.com](http://www.gunitesupply.com)) that offers online ordering of shotcrete tools, nozzles, and other accessories. The website allows concrete contractors to easily search through the catalog of tools and accessories. The site is setup to offer a completely secure online environment for placing orders 24 hours a day with the convenience to accept credit cards payments and calculates shipping to anywhere in the US and Canada.

Gunite Supply & Equipment was founded by Mr. Ray Sexton and is a privately owned company, led today by Terry Sexton Segerberg. Gunite Supply & Equipment is headquartered in Cincinnati, OH with additional warehouses in Houston, TX and Pomona, CA; our quality machines are sold

around the world through a network of direct sales, resellers, and distributors. Since our inception we have been proud to say that our entire product line is built in America from an American owned company—yes we are American Owned, American Built!

Gunite Supply & Equipment is a division of Mesa Industries, Inc., a family-owned corporation with diverse operating divisions across multiple industries.
