

# Coastal Gunite Construction Company Celebrates 40 years in Business

**C**oastal Gunite Construction Company delivers shotcrete construction services to build, maintain and rehabilitate concrete structures. Founded in 1983, Coastal Gunite Construction Company has developed a reputation for quality, integrity, and meeting strict performance requirements for both large and small projects. Their specialized experience in structural shotcrete construction allows them to provide owners and project engineers with cost-effective and enduring solutions to concrete infrastructure construction and maintenance needs.

2023 marks Coastal Gunite Construction Company's 40th anniversary, and ASA salutes your commitment to the industry!

By specializing solely in shotcrete construction services, Coastal Gunite has developed a team of well-trained, highly experienced tradesmen. Coastal Gunite has more than 125 years of shotcrete experience among their site superintendents and over a dozen trained and ACI-certified shotcrete nozzlemen. Each Coastal Gunite site superintendent has a minimum of 25 years of shotcrete construction experience.

Coastal Gunite performs structural shotcrete construction services for projects of all sizes and duration. Depending on the project, they can dispatch single or multiple mobile crews to complete any project cost-effectively and ahead of schedule. Whether it's a small culvert, miles from the nearest road, or a cooling tower stretching to the sky, Coastal Gunite has the capability to efficiently and effectively get the job done.

Coastal Gunite is experienced in both wet-mix and dry-mix shotcrete placement and can modify the process as needed to provide integrity, compressive strength, durability and to prevent migration of corrosive agents. Currently, Coastal is

a Level II ASA Qualified Shotcrete Contractor in the Dry-Mix process.

Coastal Gunite has developed a proven track record in both quality and safety. As a result, Coastal Gunite has been pre-qualified for work with Departments of Transportation in over 20 states and has developed vast experiences as well with Federal, State, and Local agencies, including various airport authorities, power utilities, and the US Army Corps of Engineers. All Coastal Gunite work is licensed, bonded, and insured.

Coastal Gunite is also the recipient of several awards and accolades. In recent years, the company has been recognized for outstanding achievement by the American Shotcrete Association and the International Concrete Repair Institute.

Today, Coastal Gunite provides services from offices located in Maryland, North Carolina, Tennessee, and Florida. For additional information, please contact their main office in Palmetto, Florida or visit their website listed below.
