Thanks to the help of our generous sponsors, members of ASA will be gathering in Napa, CA, to celebrate excellence in our industry. For the past 13 years, our members, who make up the most innovative contractors, designers, manufacturers, educators, and suppliers in the industry, have submitted a wide variety of projects for consideration as an ASA Outstanding Shotcrete Project of the Year. These projects represent the combination of experience and innovation that make the shotcrete industry so creative and dynamic.

The ASA Project Awards Subcommittee met in the fall to evaluate and select the winning project entries in a number of categories. This year, as in the past, selecting the winners was quite challenging due to the high quality of the shotcrete projects.

We urge all ASA members to begin thinking now about current shotcrete projects that may be worthy of consideration in 2018 as a Fourteenth Annual ASA Outstanding Shotcrete Project. Let's make the outstanding projects you complete *this* year be the ones we celebrate at *next* year's ASA Awards Banquet!

Look for a new entry application to open early spring. The 2018 Awards Program will accept projects completed between January 1, 2016, and September 1, 2018; multiple projects may be submitted from the same company. The deadline for submissions is October 2, 2018.
