ASA's "Quality Shotcrete – Know It When You See It" Seminar Provides:

- Education that supports ACI's Shotcrete Inspector program
- Knowledge about industry standard shotcrete practice contractors can use

Besides ensuring that your crew delivers high-quality shotcrete placement on every project, having an **ACI-Certified Shotcrete Inspector** on your team also boosts your credibility in showing project owners (or less experienced inspectors) what quality shotcrete placement should look like.

If you already have the required work experience, add this credential to your company's offerings as well!
