

Quality Shotcrete – Know It When You See It

Presented by the American Shotcrete Association

Date/Time: Wednesday, November 16, 2022 | 8:00 AM – 4:00 PM (without exam; 6:00 PM with exam)

Location: LVCC West Hall - W308

Speaker: Charles Hanskat, ASA Executive Director

Pool Builders, though you may have used shotcrete contractors for years on your projects do you know what to look for to confirm you're getting the best quality for your money? Though shotcrete is a placement method for concrete the process has fundamentally different equipment, material selection, crew responsibilities, application techniques, testing, curing and protection that need to be considered for producing high-quality and durable shotcrete you as a pool contractor and the owner expect.

This seminar from ASA provides guidance on over 40 critical elements of shotcrete applications for those onsite to properly evaluate the overall quality of shotcrete placement. These include an overview on material selections, equipment, placement techniques, finishing, curing, protection, testing, and safety as it relates to the shotcrete process. For shotcrete contractors, this seminar will help you verify the quality of your work to your general contractors and inspectors.

Optional Reference Resource can be purchased directly from ASA: CP61 Pack is the Reference Resource for the open book exam – for those pursuing ACI Shotcrete Inspector Certification.
